Norwich Avenue -- please consider allowing me to build a home in the existing subdivision as I've owned contiguous lots for about 20 years now and am up on my dues and taxes. THANK YOU now

<b>Written Public Comment:</b>	We just had a tsunami alert. Do not put wind turbines in/on the ocean. We have alternatives. We LOVE the whales and other marine life. What about the tourist industry. Big draw from around the world. WHY would you jeopardize it? We the people say NO.

<b>Written Public Comment:</b>	Stop the wind turbines that are proposed for our Beautiful Coast. Why would we destroy its beauty for the almighty dollar . Trench the ocean floor for 30 miles. NO. We the people say NO

Leadership shows itself in moments of stress and times of quiet reflection. It is not always a top-down view; the best think of "us" instead of "me." With Captain Emily Torlano it is evident in the physical bravery required of first responders and her passionate advocacy for fellow service members. Most importantly, it is demonstrated in her tireless and, at times, personally and professionally risky championing for the community.

Leaders have flaws. Sometimes, they lead with their chin, occasionally with the emotion born of devotion to service. Sometimes, mistakes happen. Leaders take those mistakes and learn, then teach others how to handle the struggle.

Leadership also demands compassion and a focus on those in peril, pain, and trauma. Giving aid and comfort while absorbing stress so the other will feel protected.

My friend Emily has shown all these things to our community.

The most remarkable thing I have seen from Emily is her compassion. I saw firsthand how her kindness and compassion married her professionalism as she and a fellow first responder from our Healthcare ambulance crew turned a terrified and frantic human into a calm and compliant patient they could take to a place where help was available.

On a more personal note,

Emily helped me deal with a situation that required everything in her kit. She de-escalated, established a rapport, offered medical and emotional choices, and later followed up with information and resources that helped us move forward.

Courage. Focus. Commitment to Service. These are traits I admire in a leader. They are also traits I cherish in a friend.

Thank you Emily, for all of it. I look forward to our continued friendship. Say hi to your mom!

**Proposition 4**

Authorizes \$10 billion in Bonds for Safe Drinking Water, Wildfire Prevention, and Protecting Communities and Natural Lands From Climate Risks. Legislative Statute.

How municipalities (including CCSD) can apply for the 2024 California Proposition 4 funds:

1. **Application Process:** Municipalities will need to submit detailed proposals outlining their projects and how they align with the goals of Proposition 4. This includes projects related to safe drinking water, wildfire prevention, and protecting natural lands from climate risks.
2. **Eligibility Criteria:** Projects must benefit communities with lower incomes or those affected by environmental changes or disasters. There will be specific eligibility criteria that municipalities must meet to qualify for funding.
3. **Submission Deadlines:** The exact deadlines for submission will be announced by the Natural Resources Agency in early 2025, but it's advisable to start preparing proposals now to ensure timely submission.
4. **Review and Approval:** Submitted proposals will be reviewed by the California State Water Resources Control Board and other relevant agencies. Approved projects will receive funding based on their alignment with Proposition 4's objectives.

# Dennis Dudzik PE – CCSD Board Meeting Input December 12, 2024

How we prepare a strong proposal for the 2024 California Proposition 4 funds:

## 1. Understand the Objectives

**Align with Goals:** Clearly demonstrate how our project supports the objectives of Proposition 4, such as providing safe drinking water, preventing wildfires, and protecting natural lands from climate risks.

## 2. Community Impact

**Highlight Benefits:** Show how our project will positively impact the community, particularly disadvantaged areas or those heavily affected by environmental changes or disasters.

## 3. Detailed Plan

**Provide Specifics:** Include detailed descriptions of the project scope, timeline, and expected outcomes. Be specific about the tasks, resources needed, and how you plan to achieve our goals.

## 4. Collaboration

**Partnerships:** Highlight any partnerships or collaborations with other organizations, agencies, or community groups. Collaborative efforts often strengthen a proposal.

## 5. Budget

**Transparent Budgeting:** Present a clear and realistic budget. Breakdown the costs and justify the need for each expense. Transparency in how the funds will be used is crucial.

## 6. Sustainability

**Long-term Vision:** Explain how the project will be sustained over time. This includes maintaining the benefits and ensuring ongoing impact after the initial funding period.

## 7. Compliance

**Meet Requirements:** Ensure our proposal meets all eligibility criteria and complies with the application guidelines provided by the Natural Resources Agency and the California State Water Resources Control Board.

## 8. Review and Feedback

**Get Input:** Before submission, have our proposal reviewed by colleagues or experts to get feedback and identify any areas for improvement.

Preparing early and meticulously can significantly enhance the chances of our proposal being approved.
