March 26, 2025

Customer:

Cambria Community Services District
Coast Union High School

Attn: Jim Green & Cody Meeks

Email: jgreen@cabriacs.org
smeeks@cabriacs.org

Findings from 3-24-2025:

- Performed an EM sweep along the proposed new road path.
- Flagged and marked water , power, and irrigation.
- Lost the signal on the sewer force main 10' from the tracer wire.
- Set 7 areas for CSD to vac for verification.

Findings from 3-25-2025:

- Laid the crew out for the vac holes.
- Rodded 3" sewer line at the lower school building. The line did not enter the dig zone.
- The crew exposed a broken tracer wire on the force main.
- Marked and flagged the sewer force main. Repaired the tracer wire and verified findings.
- Performed a GPR scan, however, the ground was unreadable due to soil density and moisture.
- Performed a passive blind sweep and found more targets in the dig zone by the pump house.
- The main and irrigation lines were 17" deep and 24" deep in the proposed new drive area. Contacted the CSD to report all findings.
- All trenches are to be in an assumed joint trench.
- More unmarked utilities were discovered in the dig zone on a passive locate but were not marked. (see Google Earth images and photos below. There is also an attached kmz file image that was made from the February 2021 image.)
