INTEGRATED WASTE MANAGEMENT AUTHORITY
Connecting the Community to Waste Solutions

IWMA 101

The San Luis Obispo County IWMA is a government entity formed through a Joint Powers Authority in 1994

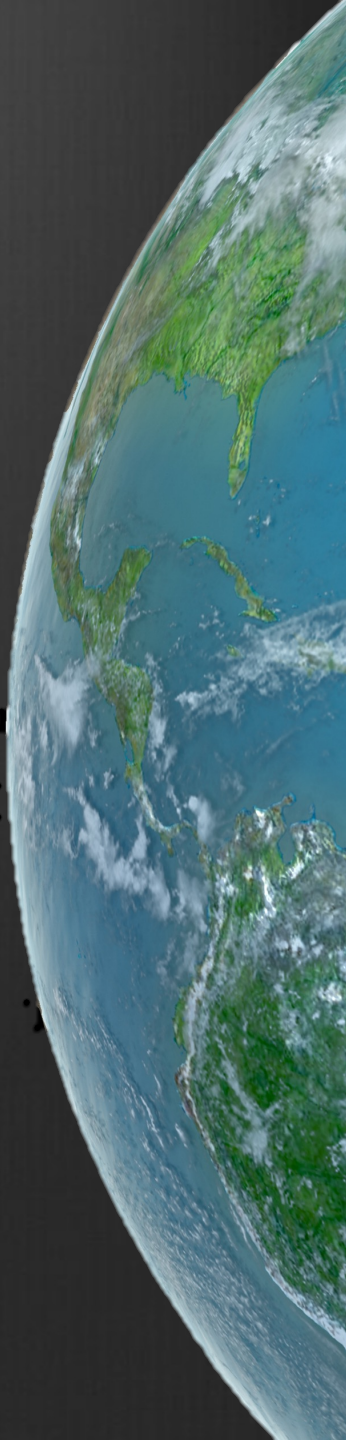

Governed by an 8-person Board of elected officials

IWMA MISSION

Coordinate efforts on behalf of member agencies to comply with state waste and recycling policy...

Provide cost-effective programs, education, and technical support

School & Public Education

Goals for Today

- 1. To learn what happens to materials put on the curb**
- 2. To better understand IWMA and the resources available to residents & businesses**

SB 1383 for Business

SAN LUIS OBISPO COUNTY

Food & Green Waste Composting Program

Senate Bill 1383 is a new State of California law that requires businesses to begin sorting food waste from trash. The goal: A 75% reduction of food waste going to landfills by 2025.

We are doing this to:

- Remove greenhouse gas-producing food waste from the landfill
- Convert food waste and green waste into valuable compost
- Create electricity to power homes
- Prolong the life of our landfills.

Steps to take:

1. Contact our Recycling Specialist to set up a free site visit to assess your waste stream and schedule staff trainings to maximize recycling and composting at your business.
2. Shout out! Tell customers you are supporting a greener world by eliminating food waste and green waste from the landfill.

CalRecycle.ca.gov

Visit the Cal Recycle Website for more information about the new recycling law.

AB 827 for Business

Attention Food Service Providers!

Effective July 1, 2020, a new **State of California recycling law (AB 827)** now requires restaurants and all other food service providers to supply **food and recycling containers front-of-house for customers.**

REQUIREMENTS

AB 827 requires restaurants and all other food service providers where customers bus their own tables to provide food and recycling containers next to trash containers front-of-house. Restaurants and all other food service providers that have table service are required to supply food and recycling containers back-of-house.

Both front-of-house and back-of-house should be visible, easily accessible, and clearly marked.
