Subject: Public Comment 7-15-24 R&I Agenda No. 4.C ZLD
Date: Monday, July 15, 2024 10:31:12 AM

We have the following suggestions for discussion and consideration.

- The CCSD will need to sign a contract with Global Water Innovations and Trevi Systems before the ZLD pilot project can proceed. We recommend that this committee review the contract before recommending approval of the project by the Board of Directors.
- The water processed by the ZLD system will be disposed of into the San Simeon percolation ponds. This likely will require a permit because of the potential for solvents and antiscalants to enter the basin groundwater and lagoon. Is the CCSD responsible for obtaining the required permits? This committee should investigate the permitting requirements and responsibilities before recommending approval by the Board of Directors.
